NAV Price	323.05

Fund Description

The 27four Shari'ah Active Equity Fund is a high risk portfolio that invests in SA listed Shari'ah compliant shares. Suitable for investors with a long-term investment horizon. The primary objectives are capital growth and income generation through dividends. Volatile movements in the value of capital in the short to medium-term are to be expected.

Risk Profile

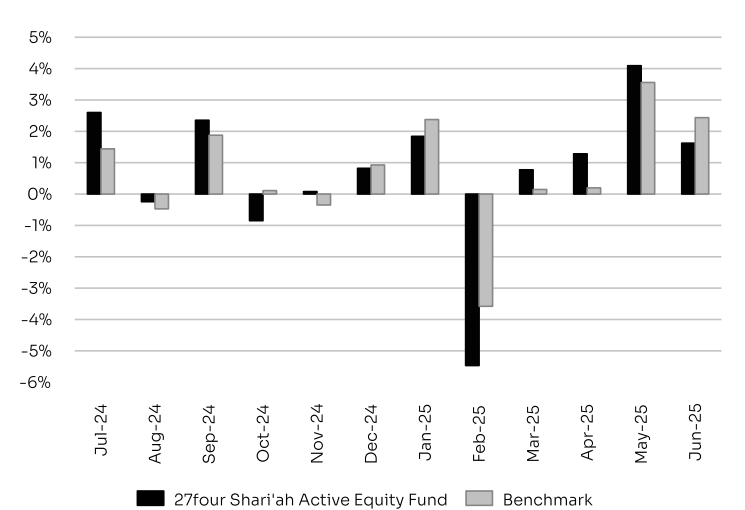

Fund Commentary

The JSE recorded an upswing during the second quarter, despite sluggish domestic growth. Gains were largely driven by industrials (+12.03%) and resource stocks (+9.77%), with gold miners benefiting from the rise in gold prices, while platinum producers saw a boost in June due to global supply shortages and heightened demand. On this backdrop, Shari'ah-compliant funds outperformed, aided by their natural tilt toward resources and reduced exposure to interest-bearing instruments. South African inflation remained below 3%, providing room for the South African Reserve Bank (SARB) to cut interest rates by 25 basis points, offering further support to equities and consumer sentiment. Globally, markets entered Q2 on a cautious note, with spikes in volatility following tariff announcements from major economies. However, tensions eased after the announcement of a 90-day enforcement pause and the signing of bilateral trade agreements with China, the UK, and other key trading partners. While trade frictions temporarily abated, geopolitical risks came forth, notably the ongoing Gaza conflict and renewed Chinese military exercises around Taiwan. Despite the uncertainty, global equity markets rallied, driven by the continued strength of the "Magnificent Seven" tech giants, which rebounded sharply and supported broader market momentum.

Against this backdrop, the 27four Shari'ah Active Equity Fund returned 7.14% for the quarter, ahead of its benchmark which returned 6.29%. Some strong performance from the funds offshore exposure which contributed significantly to the outperformance, led by iShares MSCI World USA Islamic ETF (+11.03%). While on the local front, the fund benefitted from the surge in platinum prices led by Northam Platinum (+46.43%), Impala Platinum (+26.22%), and Valterra Platinum (+17.57%). However, these gains were offset by some detractors including Aspen Pharmacare (-27.02%), Sappi (-17.77%), and DRD Gold (-16.44%). The portfolio has adhered to its policy objective.

Disclaimer

This portfolio operates as a white label under the 27four Collective Investments (RF) Pty Ltd, which is governed by the Collective Investment Schemes Control Act.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditors fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TERs do not include information gathered over a full year. A schedule of fees, charges and maximum commissions is available on request from the Investment Manager

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees.

Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by 27four by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time 27four shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the 27four platform services website

Performance has been calculated using net NAV to NAV numbers with income reinvested. The portfolio performance figures are calculated for the relevant class of the portfolio. The portfolio performance figures are calculated for the relevant class of the portfolio. The investment performance is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and income is reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the Investment Manager on request.

Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the Investment Manager and the TER.

Glossary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Best month: Largest increase in any single month.

Highest & lowest return: The highest and lowest returns over any 1 year period since the inception date.

Max drawdown: The maximum peak to trough loss suffered by the Fund since inception.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Sharpe ratio: The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

Standard deviation: The deviation of the return stream relative to its own average.

Tracking error: The volatility of the difference in returns between a Fund and its Benchmark.Also known as active risk.

% positive months: The percentage of months since inception where the Fund has delivered positive return.

Fund Specific Risks

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Default risk: The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed.The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

Derivatives risk: The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result.

Derivative counterparty risk: A counterparty to a derivative transaction may experience a breakdown in meeting its obligations thereby leading to financial loss.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Foreign investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may fluctuate more than portfolios that are more broadly invested.

Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices
