Investment Philosophy

Aeon Investment Management's equity investment style is Growth At a Reasonable Price (GARP). Our adaptation of the GARP style seeks to combine the best of growth and value investing, by buying companies with long term sustainable growth rates in earnings per share greater than that implied by the company's market valuation.

Investment Objective

The Aeon Active Equity Prescient Fund seeks to achieve:

- Invest in high quality businesses at attractive prices that are positioned for long term growth.
- Outperform the client's equity benchmark over different investment cycles.
- Consistently apply our implied growth methodology.
- Manage risk through disciplined portfolio construction.
- Employ low-cost trading techniques.

The portfolio has adhered to its fund objectives.

Fund Performance Review & Market Commentary

The Aeon Active Equity Prescient Fund A1 (CIS) underperformed its benchmark by 12 bps on a net return basis for the second quarter of 2025 and is outperforming its benchmark by 92 bps over a one-year period.

Overweight positions in AngloGold Ashanti and Prosus were the main positive contributors to return for the third quarter of 2025. Underweight positions in Gold Fields and Valterra Platinum were the main detractors. The benchmark equity index was up 12.77% for the third quarter of 2025.

Global markets entered Q3 2025 rising momentum from the prior quarter, with risk assets broadly supported by expectations of monetary easing and resilient corporate fundamentals. U.S. Treasury yields declined over the quarter, especially at shorter and intermediate maturities, as markets increasingly priced in rate cuts.

In the U.S., equity markets posted strong gains, with the S&P 500 rising 8%, with the Nasdaq and the Russell 2000 climbing even more sharply as investors rotated more aggressively toward growth and smaller-cap opportunities. Sector leadership was narrow, dominated by Information Technology and mega-cap and “AI-adjacent” names. Inflation in the U.S. remained stubborn relative to Fed targets, yet the shift in market expectations toward a more dovish Fed prevailed. However, concerns over central bank independence and political interference contributed to volatility around policy signals.

Domestically, the SARB held the repo rate steady at 7.0% in September, while markets had priced in a near 50% probability of a cut. Eskom reported a R16bn net profit for FY25, ending the period with its highest Energy Availability Factor in 5 years. South African markets outperformed their developed market counterparts as precious metals remained a focal point, with gold & silver continuing to attract interest amid geopolitical uncertainty. Platinum group metals added to the robust strength of the JSE All Share Index, with returns from PGM mining stocks, Impala, Northam, Sibanye-Stillwater and Valterra, ranging between 37% and 55% during the period. This quarter, the SA market's returns were narrow in contrast to Q2's broad market strength. Consumer, Financial, and Industrial sectors all detracted from performance, with the industrial sector leading with a 10% decline.

Our fund outperformed its benchmark by approximately 60 basis points for the quarter, while year-to-date it has outperformed by 3.1%. The top contributors to our performance for the quarter were AngloGold Ashanti, Prosus and Impala Platinum. Conversely, the main detractors from performance were our underweight positions in Goldfields and Valterra.

As a key fund highlight, we spotlight Capitec Holdings Ltd. Capitec continues to show best-in-class growth amid a weak economic backdrop. The development of the bank's network of over 25 million customers uniquely positions the bank to offer supplementary value and services, becoming more deeply embedded in the South African economy. In addition, Capitec are only beginning to make headway in Business Banking, which in our view, will lead to significant disruption of the current status quo over the long-term. Aeon has recently taken our position in Capitec to overweight on the back of this strong investment thesis. Having taken the time to deeply understand and quantify Capitec's growth opportunities, we believe the valuation is well within our Growth at Reasonable Price (GARP) investment style.

Aeon Investment Management will remain anchored to its investment philosophy based on price-implied expectations, seeking to identify companies with resilient earnings potential and positive long-term fundamentals to deliver sustainable returns for our investors.

Glossary

Annualised performance: Annualised performance show longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

cpu: cents per unit.

Alpha/Active Return: Denoted the outperformance of the fund over the benchmark.

% Positive Month: The percentage of months since inception where the Fund has delivered positive return.

Dividend Yield: The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.

PE Ratio: The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.

High Water Mark: The highest level of performance achieved over a specified period.

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest-bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information.

The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 15:00 or 17:00 depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
