Altitude Balanced Fund Investment Strategy

The Altitude Balanced investment strategy is designed to tailor investment solutions to specific risk profiles, aiming to achieve optimal risk-adjusted returns for investors. This is achieved through diversified allocations across both traditional and alternative asset classes. Currently, the portfolio breakdown includes 35% in Local Equities and 10% in Foreign Equities, providing exposure to both domestic and international equity markets. To mitigate volatility during uncertain times, 28% is allocated to Local Fixed Income funds, ensuring stability in returns. A significant portion, 15%, is allocated to Private Equity (PE), spread across 4 different PE investments. This diversification within the PE asset class reduces market exposure and portfolio volatility while potentially enhancing returns over the long term. Additionally, 9% of the portfolio is invested in alternative asset classes through 4 different hedge funds, which aim to deliver above-average returns. The investment strategy follows an active management approach, leveraging opportunities as they arise in the market and adjusting allocations based on economic changes. This approach incorporates both strategic and tactical asset allocation strategies, ensuring flexibility and responsiveness to market dynamics. The portfolio is structured to outperform CPI +5% and complies with Regulation 28, making it suitable for Retirement Annuities. This regulatory framework ensures the fund's alignment with retirement savings objectives, emphasizing long-term growth and stability for investors.

Annualised Performance

Average Return Over Time

YTD

Altitude Balanced	Benchmark	Outperformance of Benchmark
8.41%	9.80%	-1.39%

Year to date the rand gold price has continued its uptrend (+19.6%) and together with a strong run in PGM prices have boosted the RESI 20 (+56.7%), followed by the ALSI (+16.8%), INDI (+16.2%), SAPY (+5.5%), and the FINI (+2.3%). Meanwhile, YTD the rand has appreciated by 5.5% against the dollar (DXY) which has fallen by 10.8%. The Altitude Balanced Fund delivered a return of 8.41% YTD. The fund's allocation to private equity helps mitigate some of the volatility in the equity markets, which is which is currently significantly impacted by the 30% US tariffs applicable to South Africa, as well as ongoing global US trade wars. Continued uncertainties surrounding the effectiveness of the Government of National Unity remain. The MPC continued its rate-cutting cycle in July, with a 25 basis points reduction in the repo rate.

Cumulative Investment Performance

**The difference between annualized performance and the average return is that the annualized return captures the effects of compounding, whereas the average return does not.*

What is President Ramaphosa's Plan B?

Year to date the rand gold price has continued its uptrend (+19.6%) and together with a strong run in PGM prices have boosted the RESI 20 (+56.7%), followed by the ALSI (+16.8%), INDI (+16.2%), SAPY (+5.5%), and the FINI (+2.3%). Meanwhile, YTD the rand has appreciated by 5.5% against the dollar (DXY) which has fallen by 10.8%. Whilst gold and PGM miners, and Naspers have bolstered the JSE in recent months, the economy is in crisis and 30% US tariffs are coming.

In July the SARB cut the repo rate by 25bps to 7%, which reduces the prime rate to 10.5%. A small mercy, but rates are still painfully high for most citizens. Moreover, hopes of further rate cuts were dashed as Governor Kganyago plans to lower the inflation target to 3%, from the mid-point of 4.5%.

What is President Ramaphosa's Plan B for the economy? It is a National Dialogue that will begin on 15 August – "the dialogue will be a people-led, society wide process to reflect on the state of our country for us to reimagine our future. An opportunity to forge a new social compact with **clear responsibilities** for different stakeholders, government, **business**, labour, civil society, men and women, communities and citizens. The National Dialogue will drive progress towards our **Vision 2030** and lay the foundation for the next phase of South Africa's National Development Plan".

ALSI and major JSE indices (December 2021 = 100)
