Altitude Income Fund Investment Strategy

The Altitude Income investment strategy customizes investment solutions to match specific risk profiles. We allocate assets strategically to optimize risk-adjusted returns for investors, achieving this through diversification across both traditional and alternative asset classes. Currently, the fund's allocation includes 67% in Bonds & Fixed Income funds to provide stability and reduce volatility. Additionally, we allocate 5% to Local Equities and 4% to Foreign Equities for growth opportunities. In enhancing diversification, we allocate 15% to Private Equity (PE), spread across four different PE Funds, effectively mitigating market exposure and volatility. Furthermore, we allocate 8% of the portfolio to alternative assets, specifically across four hedge funds, aimed at delivering above-average returns. Our active investment management approach enables us to capitalize on market opportunities and economic shifts. While the fund may exhibit slightly more volatility compared to a Traditional Income fund, our objective is to consistently outperform the Income fund benchmark by at least 3%. This approach is grounded in robust fundamentals, strategic, and tactical asset allocation strategies. The portfolio is meticulously structured to outperform CPI +3% and adheres to Reg 28 Fund guidelines, making it a preferred choice for clients seeking income generation from their investments.

Returns (Net of Costs)	1 Month	3 Month	6 Month	1 Year	3 Year	5 Year

Annualised Performance

Average Return Over Time

YTD

Altitude Income	Benchmark	Outperformance of Benchmark
4.40%	3.98%	0.42%

Year to date the rand gold price has continued its uptrend (+20%) and together with a strong run in PGM prices have boosted the RESI 20 (+42%), followed by the INDI (+13.7%), the ALSI (+12.8%), the SAPY (+2%), and the FINI (+1.3%). Meanwhile, YTD the rand has appreciated by 6.2% against the dollar (DXY) which has fallen by 10.8%. The Altitude Income Fund has delivered a return of 4.40% for investors YTD, in line with its benchmark. The fund's allocation to private equity helps mitigate some of the volatility in the equity markets, which is currently impacted by ongoing US trade wars, as well as continued uncertainties surrounding the effectiveness of the Government of National Unity, especially following disagreements within the GNU regarding the 2025/2026 national budget, with a third budget having been presented in May. The MPC continued its rate-cutting cycle in May, with a 25 basis points reduction in the repo rate, and investors will be keen to see the MPC's decision at their upcoming July meeting.

Cumulative Investment Performance

*The difference between annualized performance and the average return is that the annualized return captures the effects of compounding, whereas the average return does not.

South Africa, our politicians only focus on the past – Vusi Thembakwayo

During a live Q&A session in the National Council of Provinces (NCOP) in June, President Cyril Ramaphosa urged all South Africans, regardless of race, to "unite in a national effort to drive economic transformation, ensure inclusive growth, and foster meaningful participation in the economy". His address emphasized that "transformation is not an option but a necessity for the country's prosperity, rejecting the idea that it conflicts with economic growth". The ANC's insistence on policies that try to fix the past are doomed to fail – GDP growth will remain way below population growth.

Year to date the rand gold price has continued its uptrend (+20%) and together with a strong run in PGM prices have boosted the RESI 20 (+42%), followed by the INDI (+13.7%), the ALSI (+12.8%), the SAPY (+2%), and the FINI (+1.3%). Meanwhile, YTD the rand has appreciated by 6.2% against the dollar (DXY) which has fallen by 10.8%.
