Therefore 0.78% (Total Investment Charge) of the value of the financial product was incurred as costs relating to the investment of the financial product.

OBJECTIVE

The objective of the MiPlan IP BETA EQUITY FUND is to obtain a return at least equal to the median of the Domestic General Equity portfolio sector in order to achieve above average capital growth.

APPLICATION

The Mi-Plan IP Beta Equity Fund utilises Vunani Fund Managers' proprietary benchmark technology to derive an industry related portfolio that seeks to deliver returns similar to those obtained by investing in the average portfolio of managers classified under the General Equity Unit Trust sector.

INVESTOR PROFILE

This product is suitable for investors seeking low cost and low relative performance risk to South African equity, or as a portfolio building block within the framework of any multi-manager fund that seeks to capture Beta returns on a portion or core of its portfolio at low cost. The benefits of this strategy are reduced benchmark relative risk, cost control and increased focus on the alpha generating managers. The risk level of the fund is classified as aggressive due to the volatility inherent in the equity market.

FUND PERFORMANCE

FUND MANAGEMENT

Saliegh Salaam
B.Com CFA
Portfolio Manager
Vunani Fund Managers

This fund attempts to capture the South African equity market returns consistent with the domestic general equity unit trust sector. To achieve this objective Vunani Fund Managers make use of proprietary software developed specifically for this purpose. Quarterly published unit trust fund data is interrogated to create a fund that best represents the sector. The resultant fund is characterized by low turnover and consistent mid-tier ranking in various performance surveys. This is in stark contrast to many equity funds experiencing stellar returns one year followed by significant under-performance the next.

In the short term this fund continues to deliver returns in line with the median of the general equity unit trust sector, however in the long term it outperforms most competitors. The fund remains one of the most cost effective general equity unit trusts due to low trading costs and low fees

An analysis of factors affecting the adherence to the policy objective is contained in the fund manager commentary together with performance as reported. A detailed listing of changes from the previous quarter is available on request from info@miplan.co.za or ipmc.clientservices@fundrock.com

Collective Investment Schemes are generally medium to long term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available on request from the manager. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Manager retains full legal responsibility for the Fund, regardless of Co-Naming arrangements. Transaction cutoff time is 14:30 daily. Each portfolio may be closed for new investments. Valuation time is 15:00 (17h00 at quarter end). Prices are published daily and available in newspapers countrywide, as well as on request from the Manager. IP Management Company (RF) Pty Ltd is the authorised Manager of the Scheme – contact 021 673 1340 or ipmc_clientservices@fundrock.com. Standard Bank is the trustee / custodian – contact compliance-IP@standardbank.co.za. Additional information including application forms, the annual report of the Manager and detailed holdings of the portfolio as at the last quarter end are available, free of charge, from ipmc_clientservices@fundrock.com. IP Management Company is a member of ASISA. A statement of changes in the composition of the portfolio during the reporting period is available on request. The performance is calculated for the portfolio. The individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The fund is invested in portfolios of collective investment schemes that levy their own charges, and which could result in a higher fee structure for the fund.

^{*} A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in adminstering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER.
