

Prescient Omba Global Equity Feeder Fund

Fund Factsheet – August 2025

Investors should read the Key Investor Information Document and Prospectus prior to investing.

INVESTMENT OBJECTIVE

The investment objective of the Feeder Fund is to achieve capital appreciation over the long term. The Feeder Fund aims to achieve this investment objective through obtaining exposure to the Underlying Fund (Omba Global Equity Fund, sub-fund of the Omba Investments ICAV), a DIVERSIFIED portfolio consisting primarily of GLOBAL equities and equity-related securities.

The Underlying Fund is permitted to invest in listed and unlisted financial instruments in line with the Undertaking for Collective Investment in Transferable Securities (UCITS) regulations and Underlying Fund supplemental documents determined by legislation or amendment thereof from time to time.

Due to the forward-pricing methodology being used by the Feeder Fund, performance may not be comparable to the Strategy performance which does not use forward-pricing. The Feeder Fund performance reflects the performance of the Prescient Omba Global Equity Feeder Fund and has been calculated using net NAV to NAV numbers after fees, with net income reinvested. *The Feeder fund launched on 5 October 2023, performance from inception until December 31, 2023, was 5.24%, however only full calendar years performance is provided in the table. The Strategy performance reflects, in ZAR, the performance of the Omba Global Equity strategy. The Omba Global Equity strategy is based on a simulated model portfolio, designed in December 2016 and invested on 10 April 2017. The strategy performance is calculated net of underlying product costs and a 30bps p.a. management fee using the closing daily market price of each underlying position in the model and includes dividend (but not interest) income, which is automatically reinvested. Past performance is not necessarily a guide to future performance. Source: OMBA effective 2025-08-31.

MARKET COMMENTARY

Global equity markets finished summer on a high note (MSCI ACWI, +2.5% MoM) with broader participation especially by US small caps (Russell 2000, +7.0% MoM) which outperformed large caps (S&P 500, +2.0% MoM) and tech (Nasdaq 100, +0.9% MoM). The US Dollar struggled once again (DXY Index, -2.2% MoM) following the soft July inflation print (US CPI, +2.7% YoY vs 2.8% consensus) and relatively dovish remarks by Powell in Jackson Hole. US bonds rallied as yields moved lower (US10Y, -13.7bps). Across the Atlantic, British bond prices fell as long-term yields increased (UK10Y, +15.2bps) with the curve steepening further. The stronger Euro (EURUSD, +2.3% MoM) and Pound Sterling (GBPUSD, +2.1% MoM) suppressed equity returns in wide Europe (Stoxx 600, +1.0% MoM) and the UK (FTSE 100, +1.2% MoM) but both outperformed in USD. Japan also delivered an excellent August (Nikkei 225, +4.1% MoM) while the Japanese Yen strengthened against USD (USDJPY, -2.5% MoM). Onshore Chinese equities (CSI 300, +10.5% MoM) rallied on record foreign inflows, state-backed margin lending and reasonable valuations as stocks yield more than 10Y Chinese Government bonds. India (Nifty 50, -1.2% MoM) succumbed to tariff pressure, with the weighted average tariff on exports to the US now above 30% and no deal in sight. Brazil which is in a similar tariff situation surged (Bovespa, +6.3% MoM) as polls showed Sao Paulo Governor Tarcisio de Freitas leading President Lula in the 2026 election, boosting sentiment. In August, we closed our European Information Technology position as SAP grew to 30% of the ETF before the recent rebalance. In addition, we trimmed our European Real Estate exposure after decent recent performance and strong currency gains. We allocated both sale proceeds to the wider European Index.

Prescient Omba Global Equity Feeder Fund

GLOSSARY OF TERMS

Annualised Volatility	Annualised volatility is a statistical measure of the magnitude of the historical daily (logarithmic) returns of the portfolio NAV, scaled to be representative of a full calendar year using a 256-day count. Only the NAV of trading days are used in calculating this measure.
Annualised Return	Annualised return is a measure which rescales returns, for periods greater than one year, to a 12-month geometric average return.
Best/Worst 12-Months	Respectively, the maximum and minimum % change in NAV Per Share over a 12-month period using daily performance data.
NAV Per Share	Net Asset Value (NAV) Per Share represents the total market value of the portfolio less liabilities and divided by the number of outstanding shares.
Positive / Negative Month(s)	A month is positive (negative) if the NAV Per Share, of a specific share class, increases (decreases) in value from the last day of the previous month to the last day of the following month.
Risk Indicator	The risk indicator for the Fund is set at 4 as this reflects the market risk arising from the proposed investments. The risk indicator is determined using historical data or, where historical data is not available, using simulated historical data. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. A category 1 fund is not risk free, the risk of loss is small but the chance of making gains may also be limited. With a category 7 fund, the risk of losing money is high but so also is the possibility of making gains.

FUND SPECIFIC RISKS

Market Risk: Value of equities (e.g., shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g., bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Currency Risk: The change in price of one currency in relation to another. This is common where you invest using multiple currencies, either intentionally or not (i.e., underlying holdings of a UCITS would be un-intentional). Change in exchange rates may have an adverse effect on performance.

CONTACT DETAILS

Management Company & Investment Manager: Prescient Management Company (RF) (PTY) Limited, **Registration Number:** 2002/022560/07, **Physical Address:** Prescient House, Westlake Business Park, Otto Close, Westlake, 7945. **Postal Address:** PO Box 31142, Tokai, 7966. **Telephone:** 0800 111 899. **Email address:** info@prescient.co.za **Website:** www.prescient.co.za

Trustee/Custodian: Nedbank Limited **Registration Number:** 1951/000009/06 **Physical address:** Nedbank Sandton, 135 Rivonia Road, Sandown, Sandton, 2196, South Africa. **Telephone number:** +27 860 555 111 **Website:** www.nedbank.co.za.

They are members of the Association for Savings and Investment South Africa. This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Scheme Control Act.

DISCLAIMER

The fund adhered to the policy objectives as stated in the Supplemental Deed in terms of allowed investments.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. A schedule of fees, charges and maximum commissions is available on request from the Manager. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. There is no guarantee in respect of capital or returns in a portfolio. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

The investment performance is for illustrative purposes only. The investment performance is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and income is reinvested on the reinvestment date. Annualised performance shows longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request. Highest and lowest is returns for any 1 year over the period since inception have been shown. NAV is the net asset value represents the assets of a Fund less its liabilities.

Prescient Management Company (RF) (Pty) Ltd is registered and approved under the Collective Investment Schemes Control Act (No.45 of 2002). For any additional information such as fund prices, fees, brochures and application forms please go to www.prescient.co.za

The OMBA Global Equity Fund is registered and approved under section 65 of CISCA.
