Total Expense Ratio ("TER")

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The prior year ("PY") TER and transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31 December 2023, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 31 March 2024.

Effective Annual Cost ("EAC")

Boutique Collective Investments (BCI) adopted the ASISA Standard on Effective Annual Cost ("EAC"). The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. BCI calculates the EAC as per the ASISA standard for a period of 3 years up till the most recent TER reporting period. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at www.bcis.co.za.

#Monthly Fixed Administration Fee: R15 excluding VAT which will apply to all direct investor accounts with balances of less than R100 000 at month end, unless an investor transacts online, in which case no such fee will be levied.

FAIS Conflict of Interest Disclosure

Please note that your financial advisor may be a related party to the co-naming partner and/or BCI. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid by portfolio to BCI, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable. In some instance portfolios invest in other portfolios which forms part of the BCI Schemes. These investments will be detailed in this document, as applicable.

Quarterly Commentary for the period ending March 2025

Global equity markets plunged after US President Donald Trump's tariff announcement on Liberation Day, with many countries vowing to introduce retaliatory tariffs. Market volatility was further exacerbated by on-again/off-again tariff announcements. The trade war sparked fears of a US recession amid slowing growth, weak consumer sentiment, and sticky inflation. The rapid reordering of global trade dynamics caused tremendous confusion and unease among investors, weighing on global equity markets. Optimism for European equity markets were significantly evident largely because of Germany's fiscal spending plan and the region's efforts to lowering inflation to the target range.

Developed market (DM) equities recorded a modest gain in April, with the MSCI World Index ending positively at 0.89% month-on-month (m/m) in dollar terms, pushing them into positive territory. The month was characterised by significant market volatility, largely driven by geopolitical events, and in particular US tariffs. Emerging Market (EM) equities also ended April in positive territory at 1.34% m/m in dollars, partially attributed to US dollar weakness. Both global property and global bonds were in positive territory at 0.99% m/m and 2.94% m/m dollars. The FTSE Index lost -0.25% m/m in pounds with the decline continuing from the March figure of -2.25% m/m. The Euro Stoxx 50 Index ended in negative territory for the month at -1.80% m/m and the S&P 500 detracted for the month at -0.68% m/m. The Dow Jones Index was the biggest detractor for the month, ending in negative territory at -3.08% m/m in dollar terms. However, Japan's benchmark Nikkei clawed back some of its March losses, ending April in positive territory at 1.20% m/m in yen terms.

SA equity markets ended the month strongly in positive territory with the FTSE/JSE All Share Index up 4.34% m/m in rand terms, despite earlier declines in response to US tariffs. The JSE was further boosted by the easing of domestic political tensions as Finance Minister Enoch Godongwana scrapped the planned VAT increase of 0.5%. Property went from an underperformer in March to the biggest gainer in April at 7.58% m/m. Industrials and Resources both ended the month in positive territory at 2.44% m/m and 2.06% m/m respectively. Financials and Cash were both in positive territory at 4.61% m/m and 0.61% m/m respectively. The bond market was positive for short- and medium-term bonds in April but negative for long-term bonds, with the FTSE/JSE All Bond Index ending the month positively at 0.76% m/m. Bonds of 1-3 years were positive at 1.06% m/m along with bonds of 3-7 years at 1.78% m/m. Bonds of 7-12 were positive at 0.77% m/m, but bonds of 12 years and above ended in negative territory at -0.28% m/m. The rand was one of the few currencies that weakened against the US dollar in April at -1.15% m/m, largely attributed to uncertainty over the stability of the GNU and strained relation with the US. The rand also weakened against the euro and pound at -6.07% m/m and -4.48% m/m respectively.
